Volume 15 **1971**

Pages

ADAMS, W. W. and STRAUS, E. G., Non-Archimedian analytic functions taking the same values at the same points 418–424

ALEXANDER, JAMES C., Morse functions on Grassmannians 672–681

ANDERSON, DOUGLAS R., Embedding connected sums of tori in codimension one 122–134

BAGBY, RICHARD J., Lebesgue spaces of parabolic potentials 610–634

BARNES, BRUCE A., Closed one-sided ideals in certain B^*-algebras 503–514

BERGER, THOMAS R., Odd p groups as fixed point free automorphism groups 28–36

BRICKMAN, LOUIS, Subordinate families of analytic functions 241–248

CHILDS, L. N., Abelian Galois extensions of rings containing roots of unity 273–280

CONRAD, P. F. and DIEM, J. E., The ring of polar preserving endomorphisms of an abelian lattice-ordered group 222–240

CURRIER, A. W., Non-compact solvmanifolds of dimension less than 4 or of rank 1 are vector bundles over compact solvmanifolds 185–196

DEMERS, L., Homology theories of functors 362–376

DENNIN, JOSEPH B., JR., Fields of modular functions of genus 0 442–455

DIEM, J. E., with CONRAD, P. F., The ring of polar preserving endomorphisms of an abelian lattice-ordered group 222–240

ERDOS, J. A., On certain elements of C^*-algebras 682–693

GIAMBALVO, V., On $\langle 8 \rangle$-cobordism 533–541

GLICKFELD, BARNETT W., On the inverse function theorem in commutative Banach algebras 212–221

GOLDBERG, SAMUEL I. and YANO, KENTARO, Globally framed f-manifolds 456–475

GORENSTEIN, DANIEL and WALTER, JOHN H., The π-layer of a finite group 555–564

GRABINER, SANDY, Ranges of quasi-nilpotent operators 150–152

XUM

Pages

GRANIRER, E. and LAU, ANTHONY T., Invariant means on locally compact groups 249–257

HILTON, PETER and ROITBERG, JOSEPH, Note on quasifibrations and fibre bundles 1–8

HOCHSTER, M., Symbolic powers in Noetherian domains 9–27

HUSSEINI, SUFIAN Y. and KNOPP, MARVIN, I., Eichler cohomology and automorphic forms 565–577

JAMES, I. M., Ex-homotopy theory I 324–327

JENKINS, JAMES A. and OIKAWA, KOTARO, On results of Ahlfors and Hayman 664–671

JENKINS, JOE W., On the spectral radius of elements in a group algebra 551–554

KEYNES, HARVEY B., The structure of weakly mixing minimal transformation groups 475–489

KIRK, W. A. and ROYALTY, W. D., Fixed-point theorems for certain nonlinear nonexpansive mappings 656–663

KNOPP, MARVIN I., with HUSSEINI, SUFIAN Y., Eichler cohomology and automorphic forms 565–577

KREITH, KURT, Applications of a comparison theorem for elliptic equations 47–51

LAU, ANTHONY T., with GRANIRER, E., Invariant means on locally compact groups 249–257

MACLACHLAN, C., Maximal normal Fuchsian groups 104–113

MAGID, A. R., Pierce's representation and separable algebras 114–121

MALTZ, ROBERT, Isometric immersions into spaces of constant curvature 490–502

MARTI, J. T., Extended bases for Banach spaces 135–143

MAY, WARREN, Invariants for commutative group algebras 525–531

MILGRAM, R. JAMES, Cartan formulae 635–647

NOVINGER, W. P., Holomorphic functions with infinitely differentiable boundary values 80–90

OATES, D. K., Topological properties associated with $\mathfrak{m}$-hyperbonvexity 153–159

Pages

OIKAWA, KOTARO, with JENKINS, JAMES A., On results of Ahlfors and Hayman 664–671

ORNSTEIN, DONALD, A characterization of montone functions 73–76

———, A remark on the Birkhoff ergodic theorem 77–79

PLANK, DONALD, Closed l-ideals in a class of lattice-ordered algebras 515–524

POLLATSEK, HARRIET, First cohomology groups of some linear groups over fields of characteristic two 393–417

REYNOLDS, WILLIAM F., Twisted group algebras over arbitrary fields 91–103

ROBBIN, J. W., Stable manifolds of semi-hyperbolic fixed points 595–609

ROITBERG, JOSEPH, with HILTON, PETER, Note on quasifibrations and fibre bundles 1–8

ROYALTY, W. D., with KIRK, W. A., Fixed-point theorems for certain nonlinear nonexpansive mappings 656–663

SENECHALLE, D. A., Euclidean and non-Euclidean norms in a plane .. 281–289

SHORES, T. S., On the theory of Engel elements in groups 578–594

SIEGEL, JERROLD, Cohomology operations in local coefficient theory .. 52–63

SLEDD, W. T., On the relative strength of Karamata matrices 197–202

SRIVASTAVA, H. M., On q-generating functions and certain formulas of David Zeitlin 64–72

STONG, R. E., On manifolds with conjugation 328–353

STRAUS, E. G., with ADAMS, W. W., Non-Archimedian analytic functions taking the same values at the same points 418–424

STREET, Ross H., Projective diagrams of interlocking sequences 429–441

SWEEDLER, MOSS EISENBERG, Multiplication alteration by two-cocycles 302–323

THOMPSON, RICHARD B., Retracts of semicomplexes 258–272

TON, BUI AN, Asymptotic distribution of eigenvalues and eigenfunctions of a general class of elliptic pseudo-differential operators 290–301

ULMER, FRIEDRICH, The adjoint functor theorem and the Yoneda embedding 355–361

Pages
